The 2003/2004 Highway Inventory Summaries

The summaries for 2003/2004 are based on the 2003 Highway Inventory current as of December 31, 2003. The 2003 Highway Inventory distances are derived from the GIS (geographic information system) based linear referencing system (LRS) and regional construction reports. Section and route distances are to 3 decimals (1 metre) and are defined below.

Section Distance - Sum of all section lengths of a specific highway number in each region. For divided highways this includes both directions.
Undivided, ahead and back directions

Route Distance - Sum all route lengths for a specific highway number in each region. For divided highways the route length (nominal highway distance) is based on the primary control line.
Ahead and undivided directions only

All section distances are identified in the shaded areas and route distances are in white areas. Route distances are not applicable for summaries based on surface type because divided sections of roads do not necessarily have the same surface.

Changes to Highway Network

A number of roads were added to the operating network and none of which are declared. However they are included in the summaries, as follows. (All totals are section distances)

PTH 1	westbound lanes (W of W Jct PTH 83 to King Street in Virden)		+10.789 km
PTH 59	south and north bound (lanes 4 lanes) (Start of divided section to north Jct PR 300) (Removal of old 2 lane location)		+14.236 km - 6.865 km
		Net	+ 7.371 km
PTH 83	Swan River Truck Route (S Jct PTH 83 to S Jct PTH 10)		+ 3.863 km
PR 300	relocation of both junctions with new location of PTH 59		+ 1.628 km
PR 355	extension to Birdtail Sioux First Nation		+ 6.725 km
PR 493	PR 391 to Community of South Indian Lake		+94.956 km
Marcel Colomb First Nation Access: PR 391 to First Nation Boundary			+ 1.720 km

Total additions to:

PTH section distance		+ 22.023 km
PR section distance		+103.309 km
Access section distance		+ 1.720 km
	Total	**+127.052 km**
